PROFESSIONAL SUMMARY

Information Technology student skilled in Python, SQL, and backend development with hands-on experience building AI-driven and database-oriented applications. Interested in backend engineering, AI systems, and scalable software development. Strong foundation in problem-solving, APIs, database management, and automation.

TECHNICAL SKILLS

Programming Languages: Python, Java Script, HTML, SQL

Backend Technologies: REST APIs, CRUD Operations, API Design

Databases: MySQL, Supabase, SQL

Libraries: Pandas, NumPy, OpenCV

Tools: Git, GitHub, Postman, VS Code

Concepts: OOP, DBMS, Database Transactions, Problem Solving

PROJECTS

AI-Agent-Credit-Risk-Assessment

Tech Stack: Python, SQL, GitHub

- Developed an AI-powered credit risk assessment system to analyze customer financial data and predict loan default risks.
- Performed Exploratory Data Analysis (EDA) using Pandas and NumPy to identify repayment patterns and financial anomalies.
- Implemented data preprocessing techniques including cleaning, filtering, and feature handling for structured datasets.
- Built prediction logic to classify customers into different financial risk categories based on repayment behavior.
- Used SQL queries for storing, retrieving, and managing customer financial records efficiently.
- Applied backend processing logic to automate customer risk evaluation workflows.
- Improved understanding of AI-driven financial analytics, predictive systems, and data handling concepts.
- Managed source code, project updates, and collaboration using GitHub version control.

vehicle-Spare-Parts-Store

Tech Stack: Python, SQL, GitHub

- Developed a backend-based inventory management system for handling spare parts, customer details, billing, and sales records.
- Designed CRUD functionalities for product management, stock updates, order handling, and customer data processing.
- Integrated SQL database operations for efficient storage and retrieval of inventory and transaction information.
- Implemented stock tracking mechanisms to monitor spare parts availability and reduce manual inventory errors.
- Applied database management and backend development concepts to streamline store operations.
- Improved system workflow for managing product information, billing processes, and customer handling.
- Gained practical experience in backend logic implementation, database connectivity, and transaction management.
- Used GitHub for maintaining project versions and source code management.

EDUCATION

B.Tech — Information Technology | CGPA: 7.75 / 10

Sri Venkateswara College of Engineering Sep 2022 – Jun 2026

XII (Inter) Percentage: 73.2%

Shri Gnanambica Junior College Mar 2020 - April 2022

Secondary Education Percentage: 79%

Rayalaseema Children's Academy April 2019 - Mar 2020

CERTIFICATIONS

HackerRank — [SQL \(Advanced\)](#)

HackerRank — [Python](#)

GenAI Powered Data Analytics Job Simulation — [Forage](#)

Data Analysis with Python — [cognitiveclass\(IBM\)](#)

ADDITIONAL INFORMATION

Languages: English (Professional), Telugu (Native)

Interests: Chess (strategic thinking), Cricket, Reading
